DIAGNOSTIC RESULT

Moderate Dementia

Model Confidence: 49.8%

Scan date: July 15, 2026 at 02:51 PM

■ AI Clinical Summary

Based on the MRI scan, the AI model identifies structural brain patterns associated with moderate dementia. However, the confidence score is only about 50%, indicating a high degree of uncertainty that requires professional verification. If confirmed, this stage generally brings noticeable difficulties with memory, communication, and managing complex daily tasks. We recommend taking immediate, practical precautions, such as organizing medications and making the home environment safer. It is also highly beneficial to establish a strong support network of family and caregivers to assist with daily living. While dementia is a progressive condition, early intervention and personalized therapies can significantly help manage symptoms over time. We strongly advise consulting a neurologist or geriatric specialist for a comprehensive clinical assessment and formal diagnosis.

■ Precautions & Lifestyle Recommendations

- Maintain a consistent daily routine to support memory and reduce confusion.
- Stay physically active — regular movement supports overall brain and cardiovascular health.
- Prioritize sleep quality and aim for a consistent sleep schedule.
- Engage in mentally stimulating activities — reading, puzzles, learning a new skill, or social conversation.
- Maintain a balanced diet rich in fruits, vegetables, and omega-3 sources.
- Keep regular follow-up appointments with a neurologist or memory-care specialist.

■ What This Could Mean Going Forward

Outcomes vary by individual — a specialist consultation is the best way to understand what this result may mean going forward.

■ Recommended Specialists & Centers

The following is a general, non-personalized list of well-known neurology and memory-care centers in India, offered as a starting point for research — not a specific referral. Please choose a specialist based on your location, insurance, and personal circumstances.

Center	Location	Specialty
AIIMS (All India Institute of Medical Sciences)	New Delhi	Neurology / Memory Clinic
PGIMER	Chandigarh	Neurology Department
NIMHANS	Bengaluru	Neuropsychiatry & Cognitive Disorders
Fortis Memory Clinic	Multiple Cities	Dedicated Memory & Cognitive Care
Apollo Hospitals — Neurology	Multiple Cities	Neurology / Memory Assessment

■ Report Details

Result	Moderate Dementia
Confidence	49.8%
