Generated on July 13, 2026 at 12:47 AM

DIAGNOSTIC RESULT

Non Demented

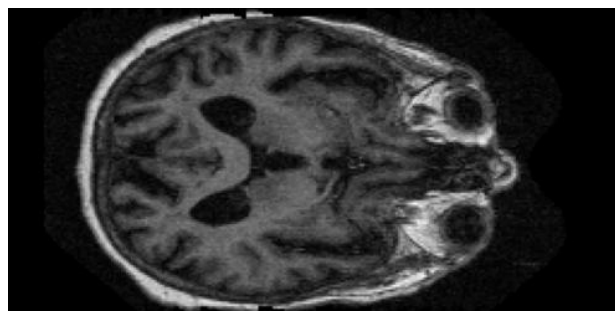

Model Confidence: 57.0%

Scan date: July 12, 2026 at 07:10 PM

AI Clinical Summary

Patient shows Non Demented pattern. Please consult a specialist. (AI summary generated fallback)
The scan pattern most closely aligns with a cognitively normal brain, showing no strong indicators of the structural changes typically associated with Alzheimer's-related decline. This is a reassuring result, though it reflects a single point-in-time analysis rather than an ongoing clinical evaluation. This analysis was generated with a model confidence of 57.0%, which reflects how closely the scan's patterns matched the category the model predicted. Confidence level is not the same as diagnostic certainty — it should be interpreted alongside a full clinical assessment, not in isolation.

Precautions & Lifestyle Recommendations

- Maintain a consistent daily routine to support memory and reduce confusion.
- Stay physically active — regular movement supports overall brain and cardiovascular health.
- Prioritize sleep quality and aim for a consistent sleep schedule.

- Engage in mentally stimulating activities — reading, puzzles, learning a new skill, or social conversation.
- Maintain a balanced diet rich in fruits, vegetables, and omega-3 sources.
- Keep regular follow-up appointments with a neurologist or memory-care specialist.

What This Could Mean Going Forward

No signs of concern were found in this analysis. That said, cognitive health can change over time, so periodic monitoring — especially if any memory or behavioral changes are noticed in daily life — is still a reasonable precaution, particularly with age or family history factors.

Recommended Specialists & Centers

The following is a general, non-personalized list of well-known neurology and memory-care centers in India, offered as a starting point for research — not a specific referral. Please choose a specialist based on your location, insurance, and personal circumstances.

Center	Location	Specialty
AIIMS (All India Institute of Medical Sciences)	New Delhi	Neurology / Memory Clinic
PGIMER	Chandigarh	Neurology Department
NIMHANS	Bengaluru	Neuropsychiatry & Cognitive Disorders
Fortis Memory Clinic	Multiple Cities	Dedicated Memory & Cognitive Care
Apollo Hospitals — Neurology	Multiple Cities	Neurology / Memory Assessment
